INNOVATION FROM
WORLDWIDE

ABOUT MACHINE

A multi-function angle and sheet cutting and shearing machine is an innovative piece of equipment designed to enhance efficiency in metalworking and fabrication industries.

This versatile machine is engineered to handle various tasks, including cutting and shearing of angles, sheets, and other metal forms.

It combines precision with power, allowing for clean and accurate cuts suitable for different applications.

The machine typically features adjustable settings to accommodate various material thicknesses and dimensions, ensuring adaptability to diverse project requirements. With its robust construction and user friendly interface, it reduces manual labor and minimizes errors, thereby boosting productivity and consistency in manufacturing processes.

Ideal for workshops and industrial settings, this machine is a valuable asset for those looking to streamline operations and achieve high-quality results in metal cutting and forming tasks.

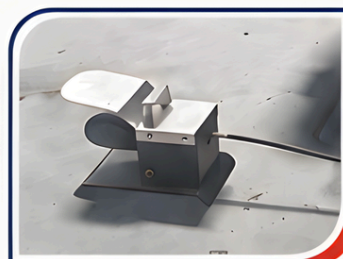

PRODUCT DETAILS

CRAFTSMANSHIP, STRIVING FOR EXCELLENCE

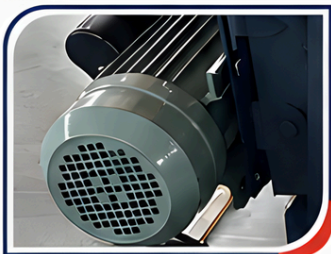

01

Installing An Electric Switch is Easy to Operate, Reassuring, And Reliable

02

Humanized Foot Switch with simple operation and peace of mind when using

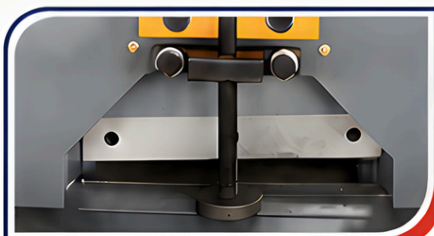

03

High Power All Copper Motor and stable Operation

04

Sharp and Durable cutting Edge, Neat and smooth cutting, Fast and convenient

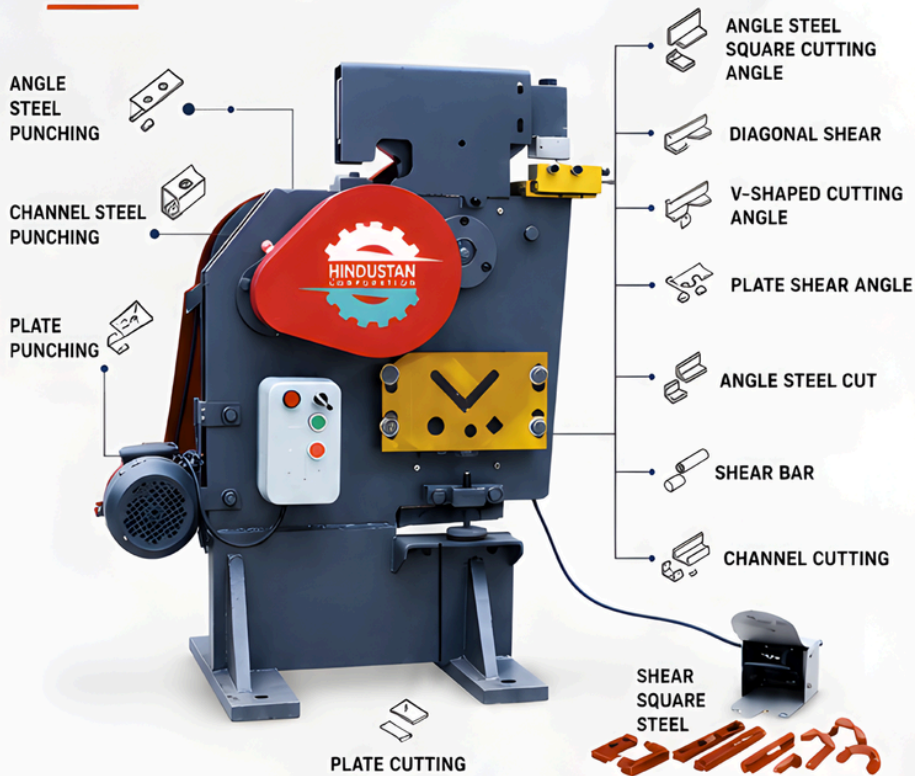

05

Suitable for cutting Flat Iron, High efficiency, simple and convenient, fast speed

MULTI-FUNCTION IRON WORKER MACHINE MODEL 8B

Powerful. Precise. Versatile.
All-in-One Metalworking Solution.

TECHNICAL SPECIFICATIONS

	Shear Strenght	360KN
	Mold Strock	27mm
	Stamping Speed	30Time/Min
	Cutter Length	180mm
	Cut Corner Steel	75*75*8mm
	Cut Flat Steel	200*8mm
	Cut Round Bar	30mm
	Shear Channel Thickness	8mm
	Moter Power	2.2 Kw / 380V
	Machincal Weight	450Kg
	Overall Dimension	1000*680*1240 mm

TECHNICAL SPECIFICATIONS

	Shear Strenght	500KN
	Mold Strock	30mm
	Stamping Speed	30 Time/Min
	Cutter Length	230mm
	Cut Corner Steel	100*100*10mm
	Cut Flat Steel	230*10mm
	Cut Round Bar	35mm
	Shear Channel Thickness	10mm
	Moter Power	3.0 Kw / 380V
	Machincal Weight	710Kg
	Overall Dimension	1000*680*1460 mm

MULTI-FUNCTION IRON WORKER MACHINE MODEL 10B

Stronger. Faster. Smarter.
Built for Maximum Performance.

MULTI-FUNCTION IRON WORKER MACHINE MODEL 12B

Stronger. Faster. Smarter.
Built for Maximum Performance.

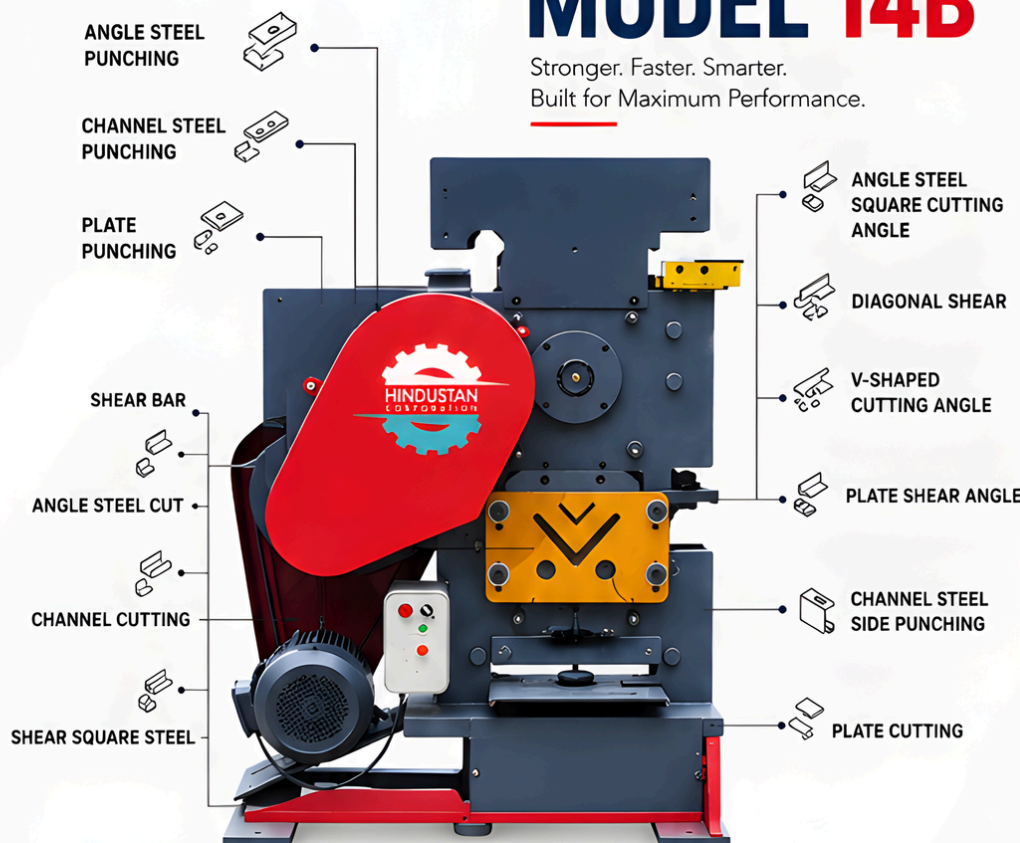

TECHNICAL SPECIFICATIONS

	Shear Strength	900KN
	Mold Strock	36mm
	Stamping Speed	30 Time/min
	Cutter Length	330mm
	Cut Corner Steel	125*125*12mm
	Cut Flat Steel	330*12mm
	Cut Round Bar	40mm
	Shear Channel Thickness	12mm
	Moter Power	4.0kw/380V
	Machinal Weight	950kg
	Overall Dimension	1200*750*1600mm

TECHNICAL SPECIFICATIONS

	Shear Strength	1200KN
	Mold Strock	36mm
	Stamping Speed	25 Time/min
	Cutter Length	330mm
	Cut Corner Steel	150*150*14mm
	Cut Flat Steel	330*14mm
	Cut Round Bar	40mm
	Shear Channel Thickness	14mm
	Moter Power	5.5kw/380V
	Machinal Weight	1300kg
	Overall Dimension	1200*750*1700mm

MULTI-FUNCTION IRON WORKER MACHINE MODEL 14B

Stronger. Faster. Smarter.
Built for Maximum Performance.

BUILDING MACHINES BUILDING FUTURE

HINDUSTAN CORPORATION

FENCING & MESH MACHINE MANUFACTURER

PREMIUM QUALITY

ADVANCED TECHNOLOGY

RELIABLE PERFORMANCE

Hindustan Corporation is a leading manufacturer of high-quality fencing and mesh machines. With advanced technology, skilled engineering, and a commitment to excellence, we deliver reliable solutions that empower businesses and build a stronger tomorrow.
